Non utilizzare per la pulizia prodotti anticalcare.

WARNING:

Mosaico Lacca and Decoro Lacca provide the application of artistic glazes that, during the firing of ceramics, generate shades of color that may not be perfectly matched to their backgrounds. These peculiarities differ from one production to another.

These ceramic decorations are made using technological processes with a high level of craftsmanship; slight surface differences are therefore to be considered as characteristics of the product and do not constitute a defect. It is recommended to clean with water or pH-neutral detergents; in the case of persistent dirt, it is recommended to use ammonia or bleach, possibly diluted with water. Do not use descaling products for cleaning.

HINWEIS:

Lackmosaik und Lackdekor sehen das Auftragen von kunstvollen Glasuren vor, die beim Brennen der Keramik Farbnuancen erzeugen, die möglicherweise nicht perfekt auf die jeweiligen Untergründe abgestimmt sind, diese Besonderheiten unterscheiden sich von Produktion zu Produktion.

Diese keramischen Dekorationen werden in technologischen Verfahren mit hohem handwerklichen Eingriff hergestellt; leichte Oberflächenunterschiede sind daher als Eigenheiten des Produktes zu betrachten und stellen keinen Mangel dar. Es ist ratsam, mit Wasser oder pH-neutralen Reinigungsmitteln zu reinigen; bei hartnäckigen Verschmutzungen empfiehlt sich die Verwendung von Ammoniak oder Bleichmittel, eventuell mit Wasser verdünnt. Zur Reinigung keine Anti-Kalk-Produkte verwenden.

Ces décors en céramique sont réalisés suivant des processus technologiques à forte composante artisanale ; par conséquent de légères différences visibles à leur surface doivent être considérées comme des spécificités du produit et ne constituent pas un défaut. Il est conseillé de les nettoyer avec de l'eau ou des détergents à pH neutre. En cas de taches tenaces, il est conseillé d'utiliser de l'ammoniac ou de l'eau de Javel, si possible dilués dans l'eau. Ne pas utiliser de produits de nettoyage anti-calcaire.

ADVERTENCIAS:

Mosaico Lacca e Decoro Lacca prevén la aplicación de esmaltes artísticos que, durante la cocción de la cerámica, generan tonalidades de color que pueden no coincidir perfectamente con los respectivos fondos, estas peculiaridades difieren de una producción a otra.

Estas decoraciones cerámicas se han llevado a cabo mediante procesos tecnológicos con un alto componente artesanal, por lo que las ligeras diferencias superficiales deben considerarse una característica del producto y no constituyen un defecto. Se recomienda limpiar con agua o detergentes de pH neutro. En caso de suciedad persistente, se recomienda utilizar amoniaco o lejía, preferiblemente diluidos con agua. No utilice productos antical para la limpieza.

ВАЖНЫЕ ЗАМЕЧАНИЯ:

Mosaico Lacca и Decoro Lacca предусматривают нанесение художественных эмалей. Во время обжига керамики они генерируют оттенки цвета, которые могут не идеально сочетаться с соответствующими фонами, эти особенности отличаются от одного производства к другому.

Эти керамические декоры были выполнены посредством технологических процессов с ярко выраженной ремесленной составляющей, поэтому небольшие различия в поверхности должны рассматриваться как особенность продукта, но не как дефект. Рекомендуем проводить очистку водой и моющими средствами с нейтральным pH-балансом, в случае устойчивых загрязнений рекомендуем использовать нашатырный спирт или белизну, возможно, растворенные в воде. Не используйте для очистки средства для удаления известкового налета, типа антинакипин.

CAM ISO 14021

Nell'aprile 2016 il Ministero dell'Ambiente italiano ha introdotto una serie di criteri ambientali per l'edilizia, chiamati CAM Edilizia - Criteri Ambientali Minimi per l'Edilizia -, volti a facilitare l'inserimento di requisiti di eco-sostenibilità nelle gare d'appalto per interventi pubblici. L'obiettivo è quello di stimolare acquisti che minimizzino l'uso di risorse naturali e il consumo di energia, che contribuiscano inoltre alla diffusione di fonti rinnovabili, riducano la produzione di rifiuti, le emissioni inquinanti nell'aria, nell'acqua e nel suolo ed che eliminino le sostanze ambientalmente pericolose.

Grazie ad un sistema di gestione ambientale sostenibile, alla certificazione EPD e in accordo con lo standard internazionale ISO 14021, Italgraniti contribuisce ad un'edilizia di qualità e prestazioni al di sopra della media di settore.

In April 2016 the Italian Environment Ministry introduced a series of environmental criteria for construction, called CAM Edilizia - Minimum Environmental Criteria for Construction -, aimed at facilitating the insertion of eco-sustainability requirements in calls for tender of public works. The aim is to stimulate purchases that minimise the use of natural resources and energy consumption levels, which also contribute towards the spread of renewable sources, reducing waste production, polluting emissions into the air, water and soil, and which eradicate environmentally hazardous substances.

Thanks to a sustainable environmental management system, to the EPD certification and in accordance with international standard ISO 14021, Italgraniti contributes towards quality construction with performance levels above the industry average.
